

HOW TO REFRESH A WEBSITE/ PAGE:

Sometimes, when visiting ANY website page (not just the churches') on your computer/ tablet, it does not show the most up-to-date information that you know should be there (such as a church service recording). The technical reason for this is usually due to the stored cache of data on your equipment relating to the website/ page possibly being out-of-date.

Refreshing the website/ page clears the old data cache and reloads the website/ page from the website thereby showing the latest information.

How to do a refresh will vary depending on the browser you use. Below summarises how to refresh website/ pages when using the two most common browsers (Google Chrome and Microsoft Edge).

If you use a different browser (or if this summary guide below is out of date) please search the internet for information about how to refresh a website/ page when using your particular browser. *If for any reason you are unable to search the internet for find details for your browser, feel free to give Bob a call for some assistance.*

First, you will need to know which browser you are using. The most common browser icons look like these:

Google Chrome:

Microsoft edge:

Safari:

Firefox:

Internet explorer:

(Internet explorer is being phased out in favour of Microsoft Edge)

In all cases when refreshing a website/ page, you will first need to open the website/ page needing to be refreshed using your chosen browser. Once opened, see below....

When using a Computer/ laptop....

EITHER Google chrome:  or Microsoft edge: 

In the top left hand corner, find a round arrow circle icon:

Clicking on this icon should refresh the page.

When using a tablet/ Smartphone (android)....

Google chrome: 

In the top right hand corner, find a 3 dotted icon:

Clicking on this icon should show a drop down list.

In the top right hand corner of the list, find and click on the round arrow circle icon:

Clicking on this icon should refresh the page.

Microsoft edge: 

In the top right hand corner, find and click on the round arrow circle icon:

Clicking on this icon should refresh the page.

As previously said, if using a different browser (or if this summary guide is out of date), please search the internet for information about how to refresh a website/ page when using your particular browser. *If for any reason you are unable to search the internet for find details for your browser, feel free to give Bob a call for some assistance.*

Good luck with refreshing your website / page.
